PROFESSIONAL SUMMARY

Data Analyst with 3.5+ years of experience building interactive Power BI and Tableau dashboards that help clients and senior stakeholders measure performance and make decisions. Strong in DAX, Power Query, data modelling, and SQL, with working knowledge of Python and Looker Studio. Background in market intelligence and campaign analysis, experienced in gathering reporting requirements, summarising key findings, and presenting recommendations across 10+ concurrent client projects. Seeking a Power BI reporting role where client-facing dashboards and marketing performance insights create measurable impact.

CORE COMPETENCIES

Programming & Query Languages: SQL (Joins, Subqueries, CTEs, Window Functions, Aggregations, Indexing, Query Optimisation), Python (Pandas, NumPy, Scikit-learn, Matplotlib), R, SAS

Data Engineering & ETL: Data Modelling, ETL Pipeline Development, Data Transformation, Data Validation, Data Quality Management, Reporting Automation, Workflow Automation

BI & Data Visualisation: Power BI (DAX Measures & KPIs, Power Query, Data Modelling, Interactive Dashboards), Google Looker Studio, Tableau, Excel (Pivot Tables, VLOOKUP / XLOOKUP, Power Query, VBA Macros)

Analytics & Data Science: Marketing & Campaign Performance Analysis, Segmentation Analysis, Statistical Analysis, Forecasting, Predictive Modelling, Root Cause Analysis, A/B Testing

Cloud & Tools: GCP / BigQuery (Concepts), Azure (Exposure), AWS (Exposure), Git, JIRA, Agile / Scrum

Domain & Soft Skills: Client & Stakeholder Management, Requirements Gathering, Data Storytelling, Presentations & Read-outs, Cross-functional Collaboration, Market Intelligence

WORK EXPERIENCE

Knowledge Sourcing Intelligence · Pune, India

Data Analyst | Market Research & Business Intelligence | *April 2023 – Present*

- Analyzed 100,000+ record datasets using SQL, Python (Pandas), and Excel to identify market trends and consumer behavior patterns — directly improving client engagement metrics by 30%.
- Designed and automated end-to-end ETL pipelines for data collection, transformation, validation, and reporting; reduced manual reporting effort by ~40% and improved data accuracy across stakeholder deliverables.
- Designed, built, and maintained interactive Power BI and Tableau dashboards tracking 15+ business KPIs including revenue trends, engagement rates, and market performance; enabled self-service analytics for cross-functional teams.
- Developed segmentation and cohort analysis frameworks to compare customer groups and measure campaign effectiveness; supported a 20% improvement in campaign targeting accuracy through data-driven strategy.
- Gathered reporting requirements and translated complex findings into executive-ready dashboards, presentations, and client read-outs for C-suite and senior stakeholders across 10+ concurrent client projects.

Datamatics Global Services — HDFC Bank Project · Mumbai, India

Associate – Data Analytics | *Feb 2022 – Aug 2022*

- Analyzed large-scale financial transaction datasets using advanced SQL and Python to identify payment trends, behavioral patterns, and operational decision signals within a live banking environment.
- Built binary classification and regression models (Logistic Regression, Random Forest) to predict customer payment behavior; improved prediction accuracy by 20% via systematic feature engineering and hyperparameter tuning.
- Delivered interactive Power BI and Tableau dashboards for senior management; streamlined recurring reporting cycles from 3 days to same-day delivery.
- Performed root cause analysis on data quality issues; implemented validation controls reducing downstream reporting errors by an estimated 15%.

Codenautics · Pune, India

Data Science Intern | *Feb 2021 – Aug 2021*

- Built ML and predictive analytics solutions using Python (Scikit-learn, Pandas); developed classification and regression models with feature engineering for performance optimisation.
- Conducted exploratory data analysis (EDA) and data visualisation using Matplotlib and Seaborn; surfaced actionable patterns from complex datasets.

KEY PROJECTS

Bank Loan Analytics | *SQL · Python · Power BI · Classification Modelling*

- Analyzed 538,000+ loan records to identify repayment trends, borrower risk profiles, and default patterns; built Power BI dashboards tracking total loan volume, charge-off rates, and verification KPIs for risk stakeholders.
- Developed classification models (Logistic Regression, Random Forest) to predict loan default probability; delivered segmented risk insights enabling data-driven lending policy recommendations.

Sales Insights Analysis | *Tableau · Excel · Python · Forecasting*

- Analyzed 50,000+ sales records; built automated KPI dashboards in Tableau and Excel reducing reporting time by 20%; applied time-series forecasting to model revenue trends and improve demand planning.

Kickstarter Crowdfunding Analysis | *SQL · Python · Tableau · Power BI*

- Analyzed 100,000+ campaign records; built multi-tool dashboards (Tableau, Power BI, Excel) for performance tracking; applied classification models to predict campaign success and identify key success drivers.

EDUCATION

Banaras Hindu University · Varanasi
Master of Computer Applications (MCA) | *2019 – 2022* | *CGPA: 8.20 / 10.00*

Birla Institute of Technology, Mesra · Ranchi
Bachelor of Computer Applications (BCA) | *2016 – 2019* | *CGPA: 8.28 / 10.00*

CERTIFICATIONS & AWARDS

- Google Data Analytics Professional Certificate | Coursera
- Data Analyst Certification | ExcelR
- Data Science for Engineers | NPTEL
- SQL – 5 Star Gold Badge | HackerRank
